

Real actions. Virtual scenarios.

CPR practice with a physical manikin, an immersive environment and real-time compression feedback.

CPR VR in practice

Physical practice

Practise on a CPR manikin in an interactive virtual scenario, with modes for laypeople and professionals.

Useful feedback

See feedback on compression performance during the simulation, then discuss the session with an instructor.

Two ways to start

Book a hosted workshop, or equip your institution to run sessions with its own instructors.

See CPR VR in action

Request a demonstration and discuss the right format for your team.

Choose your training format

Instructor-led sessions or a station for ongoing institutional use.

CPR Workshop

4 hours / up to 15 participants

VR station, conventional practice manikin, CPR instructor and technical facilitator.

Base fee: EUR 1,490 + travel

CPR Annual Programme

4 workshops / 12 months

Up to 60 participant places, including repeat practice by the same staff.

Base fee: EUR 4,990 + travel

Institutional Licence

Use approved customer-owned hardware.

One site, one station, remote setup and instructor onboarding.

First year: EUR 1,580

Renewal: EUR 1,190 / year

Complete Station

Hardware kit to own, 12-month software licence, standard EU delivery and remote commissioning.

First year: EUR 5,990

Renewal: EUR 1,190 / year

International EU base prices, September 2026. Excludes VAT and destination taxes. Hungary is quoted separately. Final scope, application language, equipment and terms are confirmed in the quotation. Attendance certificates do not constitute accredited BLS/AED qualifications.
